## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed 1/7/2009, with respect to the double patenting rejection have been fully considered and are persuasive. The double patenting rejection of claims 1-29 and 31-41 has been withdrawn.

### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 9-13 and 27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 9-13 and 27 lack the proper preamble necessary for a statutory computer claim. See MPEP 2100 for guidance on computer related inventions.

The examiner suggests a preamble as follows:

"A computer-readable medium containing computer executable instructions for causing a computer of a mobile station to execute a method of operating with a network, the method comprising"

Correction is required.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2617

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 3, 12 and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The applicant is claiming a release 1997 format/standard. However, the applicant has failed to specify which particular version of this standard is being claimed, which renders the claims indefinite.

#### ***Allowable Subject Matter***

5. Claims 1, 3-13, 17-29 and 32-41 are allowable (Claims 3, 9-13, 23 and 27 need correction as discussed above).

#### ***Conclusion***
